DETAILED ACTION

Double Patenting

1. Applicant is advised that should claim 12 be found allowable, claim 14 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 112

2. Claims 1-7, 9-11, 15-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line the phrase "the hose" lacks antecedent basis.

In claim 3, line 2, the phrase "the identification plate" lacks antecedent basis.

In claim 9, line 5, the phrase "the clamp" lacks antecedent basis.

In claim 10, line 4, it is unclear if the "hose clamp" is the same as the hose clamp recited on line 1.

In claim 10, lines 4-5, the phrase "the hose" lacks antecedent basis.

In claim 11, line 5, it is unclear if the "hose clamp" is the same as the hose clamp recited on line 1.

In claim 11, line 6, the phrase "the hose" lacks antecedent basis.

In claim 15, line 5, it is unclear if the "hose clamp" is the same as the hose clamp recited on line 1.

In claim 15, line 6, the phrase "the hose" lacks antecedent basis.

In claim 16, line 3, it is unclear if the "hose clamp" is the same as the hose clamp recited on line 1.

In claim 16, line 4, it is unclear if the "identification device" is the same as the identification device recited on line 1.

In claim 17, line 5, it is unclear if the "hose clamp" is the same as the hose clamp recited on line 2.

In claim 18, line 2, it is unclear if the "hose" is the same as the hose recited on line 1.

In claim 18, line 5, the phrase "the hose 30" lacks antecedent basis.

In claim 19, line 2, it is unclear if the "hose" is the same as the hose recited on line 1.

In claim 23, line 2, it is unclear if the "hose" is the same as the hose recited on line 1.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4, 6-9, 11, 13, 14-23, and 25-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Schweikert, US 2003/0066218.

With respect to claims 1, 11, 13, 15, 16, 17, 18, 19, 22, 23, and 24, Schweikert teaches catheter information ring 110 comprising an identification member 124, and a cross member 112 attached to the identification member, wherein the cross member transverses a hose clamp 170 to retain the identification member 124 adjacent the clamp independently of the hose on which the hose clamp is located.

With respect to claim 2, the identification member is in the form of a plate. (See figures 1-12).

With respect to claim 3, Schweikert also teaches a stabilizing plate 130 attached to the cross member 112 so the stabilizing plate is substantially parallel the identification plate.

With respect to claims 4, 25, and 21, the stabilizing plate taught by Schweikert is removable retained substantially adjacent the clamp. The information ring is adapted to selectively inserted and removed from the clamp both independently of the clamp in one embodiment and independently of the hose or conduit in another embodiment.

With respect to claim 6, the identification device substantially matches the contours of the hose clamp so no portions of the identification device substantially protrude beyond the hose clamp. (See paragraph 0042).

With respect to claim 7, the identification device is secured adjacent the hose clamp to reduce or prevent movement of the identification device independent of the

Art Unit: 3611

hose clamp The information ring is adapted to have the hose or conduit extend through opening 122.

With respect to claim 20, the opening 22 allow the information ring to engage the hose or conduit.

Allowable Subject Matter

5. Claims 5 and 24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. Claim 10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

7. Claims 12 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
